DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4 and 7-25, drawn to a system and method for building a software system, classified in class 717, subclass 103.
 - II. Claims 26-28 and 30-35, drawn to a building machine and a data structure for use in software development, classified in class 717, subclass 107.
 - III. Claim 29, drawn to a build manager for generating information for generating information for use by a build machine, and for transmitting information to and from a build machine, classified in class 717, subclass 100.
 - IV. Claims 5 and 6, drawn to a data packet for transmitting information, classified in class 709, subclass 213.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the claims merely discuss the act of organizing and distributing files to the one or more build machines, and do not discuss subsequential actions by the build machines which contribute to the overall workings of invention I. The subcombination has separate utility such as being a computer system used for the

compilation of software distributed over a network, which would not include the various steps outlined in invention I.

- 3. Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as a database system for handling queries relating to components available on a network, and does not perform the steps of building software based on distributed files. See MPEP § 806.05(d).
- 4. Inventions I and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions relate to a system for building a software system in invention I, and a data packet adapted to transmit information between computer systems in invention IV. Invention IV is dictating the workings of a data packet and its intended use, whereas invention I discusses the distribution of files, and does not indicate the method of transmission.
- 5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 6. A telephone call was made to Himanshu S. Amin on September 16, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Application/Control Number: 09/729,448

Art Unit: 2124

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Trent J Roche whose telephone number is (703)305-4627. The examiner can normally be reached on Monday-Friday, 8:30 am - 5 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kakali Chaki can be reached on (703)305-9662. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703)305-3900.
